Questions and Answers

1. What are the Halls of REisha-TA?

- In Trimester 4, the Akashic and Ecoushic Record 1st Cells open, merge, and turn into the REi-ShA-ic Record Eternal Cell (called the Krystar), opening the Halls with all the 12 time vectors in the center of the ELum-Eiradhona Spirit Body.
- The Akashic (AdorA side) and the Ecoushic (EtorA side) 1st Cell and 8-Cell Structures open to each other and merge their 2 Eiradonis Currents, forming a unified structure with 7 REisha-TA Density Suns: the REi-ShA-ic Density Memory Matrix—The Halls of REisha-TA.
- The Halls of REisha-TA are our Natural Memory Matrix, where you can go into Creation Point to experience everything from the Eternal Now, as Source does.

2. What are the 7 REisha-TA Suns?

- The 7 REisha-TA Sun Cells form the Cosmic REi-ShA-ic Density Memory Matrix (Halls of REisha-TA) and the 7 Celestalline Sun Density Seals.
- They are also called Celestalline Suns: C-Suns.
- The 7 Suns of REisha-TA are 7 Hydrogeleziac crystalline bodies of Eiradonis of the ELum-Eiradhona Spirit Body REisha-TA Cluster.
- When the Akasha and Ecousha 1st Cells progressively activate, they merge their Eiradonis-Atomic Adjugate Spirit Hydrolase Currents and birth the 7 Hydrogeleziac Hydros hydroplasm liquid light REisha-TA Sun Cells.
- These electromagnetic barriers can be opened and closed:
 - Sun 1 at 0.5 Span: The Ra-LA Eyugha Sun Cells, or the (AmorAea Eckasha-Aah) Cosmic and Planetary Eton Cells, corresponding with the Cosmic Density-1 Core Domain and Density-1 in the smaller Domains.
 - Sun 2 at 3.5 Span: The Aah-LA Eyugha Sun Cells, called the Solar Adon Cells, corresponding with Density-2 and the Inner Domain.
 - Sun 3 at 6.5 Span: The Sha-LA Eyugha Sun Cells or Galactic Edon Suns, corresponding with Density-3 and the Middle Domain.
 - Sun 4 at 9.5 Span: The KaLA Eyugha Sun Cell Radon Suns, corresponding with Density-4 Universal Veca and the Outer Domain.
 - Sun 5 at 12.5 Span: Universal Ecka Level-1 corresponding with Adashi-1. Density-5
 - Sun 6 at 15.5 Span.
 - Sun 7 is in the OrEia Field and has the same size as the ELum-Eiradhona.

3. What is the function of these 7 Celestalline Sun Density Seals or C-Seals?

- The C-Suns create electromagnetic barriers: The 7 Celestalline Sun Density Seals. These C-Seals are time-lock vector seals between Time Cycles, Densities and Domains of the Cosmic Body with 15 Rings and Spans, so time can be experienced linearly.
- C-Seals correspond with the Time Cycles bringing in the frequencies of portions of your Light Body Identity: Soul, Oversoul, Avatar and Rishi levels of consciousness.
- C-Seals go from the Cosmic Connection to the Planetary, up to Solar (Aundanc Seals), up to Galactic (Yunasai Seals) and up to the Veca Level (Aurn Seals).
- Once we get through the KaLA Eyugha, the seals would naturally open and bring all of the core currents (LaVas) of all the Domain Bodies before to give a being or a Solar System enough quantum to make the Adashi turnaround. In the KaLE-Hara state we do the Adjugate Bond and Celestalline Wave to go into a Krystar State, in our Krystar Capsule. They then activate the frequencies of Density-5 Adashi-1 Cycles in our bodies, then the Adashi-2 Cycles and then the Adashi-3 Cycles—the parts of your “future.”

4. What is the harm caused by the 6:6:6 triangulation?

- The ones from the Wesedak Matrix Black Hole System hijacked a part of the Crystal Core Gates via the 6:6:6 triangulation. It is an alignment between the gates here, the Milky Way Galaxy, and the Andromeda (M31) Galaxy. A cluster of a set of interface-gates put around the Crystal Core Gate in the North Sea were taken over and plugged in Appolyon, the “dark fallen sun” on the YHWH side in the Wesedak Matrix. One runs through Paris, it runs through Brussels; and it runs through Amsterdam.
- This triangulation helped to hold Earth hostage, and it is run through the Nibiruian Diodic Crystal Grid that has been progressively seeded here. It prevented the Keepers of the Crystal Core from accessing the Crystal Core Gates.
- The 6:6:6 triangulation kept also the Sun locked into the Procyak-MilkyWay-False Memory Matrix.

5. Where are the mutations held that block the Celestalline Wave?

- Because of environmental influences in our Planetary, Solar and Galactic systems like the “Bloom of Doom” and the “Daisy of Death” in the 6:6:6 triangulation, we have mutations at our C-Suns and C-Seals: C-1, C-2, C-3 and C-4.
- These mutations in the 1st 4 layers of our bodies plug us into a False Memory Matrix that is called the Procyak Matrix. This has to do with Wormhole technology from the Yahweh Matrix in the Wesedak System that is connected to the center of the Black Hole in the center of the Milky Way. The “Curse of Yahweh” helped to finalize the Fall of our Milky Way System.
- The FA have made barriers where the natural Suns and Density Seals would be, and have blocked them in reverse currents. Because of that the frequency-running ability is cut in half, turning the currents on themselves and forming what are

called the unnatural Yin-Yang flows that literally are a form of Tube Torus of convoluted energy that turns in on itself continually in and around our bodies.

- When you are going into Adashi Ascension, LaVa currents would show on the pupil. But now our pupils are all black because of the mutations.

6. How can we heal ourselves by doing a Journey to the Halls of REisha-TA?

- Since the Nov. 4, 2007 activation and opening of the Halls of REisha-TA has occurred in the Andromeda Shield, the AquA'elle Matrix Shield and the Aquafereion Shield, we are able by doing this Journey to pick up our full *Original Imprint* in the Halls of the REisha-TA.
- At that point we are able to do a projection with not just the Rasha Body *but also with the Eiradonis Body*, through the DhaLA-LUma Door into the Halls of REisha-TA to get back the original Codes that will clear the 6:6:6 phase-lock on our Merkaba fields and Atomic structure.
- The mutation starts in the fetal body and connects our Physical Body encryption to the False Memory Matrix. By doing the Journey we bring back this imprint of our cells where it should be—in our Natural Memory Matrix, the Halls of REisha-TA.
- There we are being invited to clear distortions in the 1st 4 layers of our bodies, because they block us from being able to do Starfire, or even Slide.
- Clearing these mutations begins the processes of naturally turning on the (LaVa) currents.
- By doing this Journey, every descendant of the Jesheua-12 7th line will get a jump-start on the healing process that will eventually assist the *entire* shield, as well as plants, animals and parts of the planet.

7. Which activations can you see for yourself in your eyes?

- When your C-Seals progressively open, our Adjugate Twins bond; they will draw in both Manifest Bodies, transmuting their Atomic matter to Celestalline.
- By bringing the Spirit Body frequencies back into the Light Body frequencies, certain activation levels of the Celestalline Wave in the Rasha Bodies will show in the eye-rings before turning the Atomic Body progressively into liquid light.
- Then you would get a pretty pale turquoise ring—an Aqualene Sun Ring—around the space between the whites of your eyes and where your iris is.
- Inside the turquoise ring is an indigo blue ring between the pupil and the iris.
- The iris corresponds with where you are now, just *before* your Adashi in the future.
- The whites of your eyes correspond with the frequencies of the Adashi Cycles.
- Because of the Eye of God structure in your head, these LaVa Currents would eventually come out of your eyes—the Eyes of Love.
- The starburst around the pupil shows which Allurean Chamber Lines of the Spirit Body you have opened.
- There would be flickering rainbow colors coming out of your pupils, and you may get little bursts of feeling eye-burning, as if frequency is flying out your eyes. When you are going into Adashi Ascension, having released your C-Seals, these

LaVa Currents would show on the pupil and all the bands in the eyes would activate, each showing a specific color.

8. How do the Chakras correspond with the ELum-Eiradhona?

- By turning on the frequencies of the Spirit Body ELum-Eiradhona in your body, your Chakra system is supposed to be running different frequency-levels of the Domains and Adashi Cycles.
- The Middle Domains, where we were before, correspond to Chakras 2, 3, and 4.
- The Outer Domains, where we are now, correspond to Chakras 5, 6 and 7.
- The Adashi-1 Cycle (in the future) would correspond to Chakras 8, 9 and 10.
- The other Adashi Cycles correspond to Chakras 11,12, 13, 14, etc.
- Because of the mutations in the C-Suns and C-Seals the frequencies of the ELum-Eiradhona are not running through your Chakras.

9. What is the process of the Hydrolase Conversion?

- When any Elemental Atomic Eiradonis Current combines with its Adjugate Twin Eiradonis Current, these 2 *Hydrolase* Eiradonis Atomic Geleziac Currents merge and transmute into hydrogeleziac *hydroplasm* liquid light current.
- Hydroplasm forms an Eiradonis Atomic frozen light materialized skin over the Eiradonis Template that is underneath. This Matter membrane merges with the DhaLA-LUma Door and Eye of Allurea within the core of the Akashic and Ecoushic Record 1st Cells, merging them into 1 REi-ShA-ic Record Eternal Cell.
- Upon activation of this Krystar REi-ShA-ic Sun Cell the Eiradonis Hydrolase Adjugate *Spirit Body* Currents merge with the EtorA and AdorA *Light Body* Currents and transmute to *Hydros*, forming the transcendent element *Celestalline*.
- This releases a Celestalline Wave through the 12 Allurean Chambers, by which the EtorA and AdorA Hall of Records 8-Cells merge, opening the REisha-TA Halls of Records within the Cosmic REisha-TA Body.
- The Hydrolase-converted Hydros liquid light Celestalline hydroplasm matter form enters the Krystar State for Starfire passage into the Adashi Return Cycles through the Halls of REisha-TA.
- Hydrolase Conversion is a part of the Solar Symbiosis; UV light brought in the body through the KAlons in the skin helps expedite this process. Returning to our original biology is becoming a breatharian, “eating” light by Hydrolase Conversion. Adashi masters use it to go in hyperspace, able to visit every place and time they like.

10. Why do you use Ring Tones and Span Tones?

- When you do the different cycles of the Ring Tones and the Span Tones, you activate the NaVA-Ho Cycles of the Rasha Body to progressively open the corresponding Domain layers, which correspondingly turns on the layers of the Light Body. Opening the core frequencies behind us gives enough thrust to make the turnaround into the Adashi Return Cycles.

11. Who are the Crystal Core Keepers?

- The race-line from Seeding 1, 200 million years ago, were referred to as the “Keepers of the Crystal Core.” In that timeframe a grid was set that linked directly in one of the Earth’s Core Gates: Shala-13. Seeding 1 had not only a Turaneusiam Angelic Human raceline but also an Aquareion line. This pure Aquari Guardian race became the Keepers of the Crystal Core.
- These Crystal Core Keepers became extinct 5.5 million years ago in the Electric Wars, and the 7th hidden line of Jesheua-12 was a *bio-regenesis attempt* to bring back the Codes of the Crystal Core Keepers by his daughter AquA’elle in 27 AD. AquA’elle’s daughter “White Buffalo Woman” in America was the main lineage.
- This particular race regenesis was done in the area of Amsterdam and Ireland because the Crystal Core, our link to Urtha, is in the North Sea. And because the lineage is still here (in 2007), the opening of the Halls of REisha-TA was possible. There are also some Crystal Core Keepers among the Navaho Tribes in America and their descendants.

12. What’s the Gift of AquA’elle?

- The Gift of AquA’elle is a support system called the “Four Hearts of AquA’elle,” a series of interfaces near Dublin, Amsterdam and another place. Because the Halls of REisha-TA (Nov. 2007) opened in Andromeda, the 6:6:6 triangulation was released while the Keepers of the Crystal Core—with the help of the Guardians—hold the Crystal Core stable by putting it into the “Four Hearts of AquA’elle.” Just like Spanner-7 Gate in Phoenix, these “Crystal Core Grids” link to the Shala-13 Core Gate and now open potential passage for groups of people, and even portions of land masses, that would not otherwise have the ability to Slide and get to the Halls of Records.
- Because AquA’elle was born in Urtha, she had a full set of the Keepers of the Crystal Core Codes. Creating a gene-line with this “Gift of AquA’elle” was bringing back the direct Core-to-Core opening between Shala-13 (in Earth’s Core) and Andromeda through the AquA’elle Matrix.

Vocabulary

1. SEda Cycle:

The SEda Cycle is the Cycle of the Spirit Body. It has 4 Stages in Trimesters. The 1st Trimester is the Triad Cycle. The 2nd Trimester is the Ecousha-TA Cycle, forming the Eye of God structure and the Akashic and Ecoushic Hall of Records. The 3rd Trimester is the Reusha-TA Cycle. The 4th Trimester is the REisha-TA Cycle, forming the Halls of REisha-TA within the ELum-Eiradhona Spirit Body

2. ELum-Eiradhona:

The name of the structure of the Spirit Body. The 15 Geleziac Layers will activate by progressively activating the 12 Allurean Chambers, just as with our own personal Spirit Body, the Eiradonis.

3. OrEian Field:

Outside the ELum-Eiradhona Spirit Body is the OrEian Field—the immediate ambient field in Source Consciousness Field, the emanation from the Light and Spirit Structure that grew in Source Field, the undifferentiated portion of Source Consciousness Field.

4. Solar Symbiosis:

Hydrolase Conversion is a part of Solar Symbiosis. UV light brought in the body through the KAlons in the skin helps expedite the following process: 2 *Hydrolase* Eiradonis Atomic Geleziac Currents merge and transmute into Hydrogeleziac *hydroplasm* liquid light Currents, and when these Spirit Body Currents merge with the Light Body Currents, Hydrolase becomes *Hydros*, which forms *Celestalline*.

5. Celestalline:

Celestalline is a transient element that can be activated within the hydrogen bonds of the DNA. When you bring together the Eiradonis Bodies (Spirit Bodies) of 2 sets of Elemental Adjugates, they will draw in the 2 Matter Bodies (Manifest Bodies). These 4 bodies—the full set of 2 from each vector, the AdorA and EtorA—pull together and transmute the Atomic structure to Celestalline just before temporarily turning it into liquid light, so you are able to go through Stargates.

6. Krystar State:

Once we finish the KaLA Eyugha we are supposed to get a quantum rush with all the frequencies turning on and be able to go into Krystar State for Starfire passage into the Adashi Return Cycles through the Halls of REisha-TA. We enter the KaLA-Hara State, where we do the Adjugate Bond, and the Celestalline Wave, where we literally turn into Hydrogeleziac Liquid Light stuff.

7. Krystar Vehicle:

When we turn into Hydrogeleziac Liquid Light, this Celestalline Hydroplasm Matter form enters the Krystar State and your field forms a Krystar Vehicle. When you go into Rasha Body this lovely crystalline structure forms around you like a capsule. It corresponds to the 15 Geleziac Layers of the whole template of your ELum-Eiradhona Spirit Body.

8. Starfire-able:

It is the ability, once we have finished the KaLA Eyugha, to make the turnaround into the Adashi Return Cycles, taking the Path of Incension (in toward the Core).

9. Breatharian:

Our original biology is breatharian, breathing living light by Hydrolase Conversion, a part of the Solar Symbiosis. So you don't need food to stay alive.

10. Crystal Core:

A very ancient direct connection to Shala-13, one of the Core Gates of Earth; it links directly through the AquA'elle Matrix to M31, this galaxy's original home. During Seeding 1, 200 million years ago, it was put in Earth. Later it was hijacked, but with the opening of the Halls of Reisha-TA in 2007 the Crystal Core was put into the Four Crystal Hearts of AquA'elle link, holding it open and stable with the unplugging of the 6:6:6 triangulation in the grids.

11. The Four Crystal Hearts of AquA'elle:

They are the Crystal Heart Grids called "The Gift of AquA'elle," a support system holding the Crystal Core stable and open. It's a series of interfaces near Dublin, Amsterdam and another place. Without this Gift we would not be able to have the opening of the Halls of REisha-TA.

12. AquafarE:

From the 7th hidden line of Jesheua-12, the main lineage of "White Buffalo Woman" ended up with one set of 7, each having 7 children. The first of the 7 would stay on Earth and the 7th would be taken to the AquA'elle Matrix and then to the Andromeda Matrix. The last ones created became the AquafarE race. This is the race-line that is completely compatible with the Angelic Human Aquari race-line here. If we don't take our bodies, we would go into an AquafarE line there as our next incarnational line.

Multiple Choice

1. Which Trimester of the SEda Cycle is the REisha-TA Stage?

- (a) The 1st Trimester.
- (b) The 2nd Trimester.
- (c) The 3rd Trimester.
- (d) The 4th and last Trimester.

2. The name of the powdered residue left as a body has turned into liquid light is

- _____.
- (a) white powder gold
 - (b) blue powder gold in Egyptian time
 - (c) Celestalline
 - (d) Hydrolase

3. **What do Eiradonis Currents form as they go from being Hydrolase into Hydros?**
 - (a) The ELum-Eiradhona.
 - (b) KAlons.
 - (c) The transient element Celestalline liquid light.
 - (d) White powder gold.

4. **For Starfire passage into the Adashi Return Cycles we need to go _____.**
 - (a) through the four Crystal Hearts of AquA'elle in Krystar State
 - (b) to the Adashi Temples in the Aurora Safe Zone
 - (c) through the Halls of REisha-TA in Krystar State
 - (d) through the Halls of REisha-TA in Light Body

5. **What do we temporarily leave in the Halls of REisha-TA during the Journey?**
 - (a) Our Krystar Capsule.
 - (b) Our Spirit Body (Eiradonis)
 - (c) Our Light Body.
 - (d) Our Rasha Body.

6. **What expedites the Hydrolase Conversion through the KAlons in the skin?**
 - (a) Ozone.
 - (b) UV light.
 - (c) Water.
 - (d) White powder gold.

7. **The bio-regenesis attempt of the hidden 7th line of Jesheua-12 was to bring back the _____.**
 - (a) Codes of the Crystal Core—our link to Urtha
 - (b) Codes of the 6:6:6 triangulation—our link to Urtha
 - (c) Codes of the Aurora Safe Zones
 - (d) Codes of the Halls of REisha-TA

8. **The natural gate interface structures to Urtha via Shala-13 and the AquA'elle Matrix are the _____.**
 - (a) Four Crystal Hearts of AquA'elle
 - (b) Halls of REisha-TA
 - (c) Aurora Zones
 - (d) Shala-13 Core Gates

9. **What is the “Curse of YHWH”?**
 - (a) The Daisy of Death.
 - (b) The Bloom of Doom.
 - (c) The Four Crystal Hearts of AquA'elle.
 - (d) The 6:6:6 phase-lock on our Merkaba fields and atomic structure.

10. Where are the Keepers of the Crystal Core now?

- (a) In the Adashi Temples.
- (b) In the areas of Amsterdam, Ireland, and some among the Navaho Tribes in America.
- (c) In the AquA'elle Matrix.
- (d) In the Wesedak Matrix

11. What releases the 6:6:6 triangulation?

- (a) The opening of the Aurora Safe Zones in the AquA'elle Matrix.
- (b) The opening of the Halls of REisha-TA in Andromeda.
- (c) The activation of the Bloom of Doom.
- (d) The activation of the Daisy of Death.

12. Where does the AquafarE race come from?

- (a) Each 1st child of the 7 lines of Jesheua-12 who went back to Urtha.
- (b) Seeding 1 of the Turaneusiam-II.
- (c) Each 7th child of the 7 lines of Jesheua-12 who went back to Urtha.
- (d) Turaneusiam-I from Tara.
