Questions and Answers

- 1. Emerald is the dominant color of the fully activated Amoraea Flame Body, and this is where the term “Emerald Covenant” originates. True or false?**
 - True. Full Flame Body activation combines the non-visible color spectrums of the ManA (gold), ManU (a deep rich azurite blue) and EirA (pale silvery blue) to create a blue-green emerald coloring; you can "see-feel" it from the sound field beyond light-oscillation, more into the core vibrational frequency level.
- 2. Falling asleep during a taped technique means you aren't ready for that particular activation yet; you need to become more familiar with previous techniques first. True or False?**
 - False. Falling asleep just means your body isn't used to holding that frequency yet. Your frequency is expanding and your body is getting tired, so your consciousness is going higher in frequency and will pick up the encoding from the astral. It will take awhile to be able to remember it consciously, but it will happen with continued practice.
- 3. Code images are inanimate instructions for our multidimensional bodies, much like instructions for connecting and powering a stereo. True or False?**
 - False. Codes represent living consciousness collectives. They hold mathematical instructions for our shields, since everybody's shields are a smaller part of the consciousness collectives. That means everything manifest is a part of the consciousness collectives, part of a family of consciousness—in a way they are like "our ancient, ancient original relatives."
- 4. Flame Body activation is no longer useful after plugging into the Golden Fleece Host Matrix. True or False?**
 - False. The Flame Body activation process can be speeded up by working with the Flame Body Activation Techniques directly as opposed to letting the activation automatically filter down through the collective shields.
- 5. DNA activation is a natural part of every Stellar Activation Cycle. True or false?**
 - True
- 6. The Black Hearts of Metatron are a series of implants designed to rapidly reverse the activating template into Metatronic fall. They exist in the Personal,**

Planetary, Galactic and even Universal shields up to Dimension 11.5. True or false?

- True.

7. The real crucifixion story was about Metatronic implants blocking/crucifying our ability to run D-12 Maharata/Christos current to activate our Flame Bodies and the Silver Sanctum. True or false?

- True

8. We have a subconscious mind because of electrostatic fields blocking frequency flow between our Dimensions 1 and 2 levels of consciousness and our Dimension 3 awareness. True or false?

- True.

9. Shadow Dancers, beings from black hole systems, could push their consciousness through the Shadow Body template and force a possession of the physical body. True or false?

- True, although this scenario is much reduced since all connections to Phantom Matrix closed as of Hetharo anchoring of the Christos Seed Atom and Shadow Reclamation.

Vocabulary

1. Metatronic Code:

The mathematical formula that creates black hole Merkaba vehicles; also known as the Fibonacci sequence.

2. Transharmonic:

The ability to shift the axis on which atoms spin from the angle of one Density to a another different Density angle (e.g., Density-1 to Density-2).

3. Ankh:

An external tool based on Metatronic sequence technology. It could be used to do amazing things ("they could move mountains if they wanted to"); it worked by sucking power out of the planetary grids by ripping holes in them.

4. Veca Codes:

The shield codes that activate/open Density Locks, allowing for progressive activation of Flame Body levels, DNA and associated Merkaba levels.

5. Cruxansataea:

A natural Ankh-shaped field configuration within a fully activated Amoraea Flame Body.

6. BST/Beast Machine:

Technology using electromagnetics on a multidimensional spectrum that has the ability to take people, planets and galaxies into black hole status. "BST" stands for Blank Slate Technology because the technology literally shatters the memory matrix and reassembles it in an inorganic way so one becomes cut off from creation.

7. Celestalline:

A hormone derivative substance that allows the body to create other hormones that will allow changes in atomic structure. Excreted as liquid just before and after Star Gate travel, rapidly drying to a light dusty powder. Also called Blue Powder Gold in its pure form.

Multiple Choice

- (b) Manual Merkaba spins.
- (c) Optical-pineal induction of composite shield codes.
- (d) Astral coupling/direct code download.

2. The term "Emerald Covenant" comes from _____.

- (a) the original copy of the co-evolutionary peace treaty holographically encrypted into emerald crystalline projection stones
- (b) Founders races who work with knowledge of the Emerald Amoraea Flame
- (c) the fact that only those races from Emerald Order Melchizedek Cloister lines are welcome to uphold its principles
- (d) a and b
- (e) a, b and c

3. The phrase "be your own Ankh" refers to _____.

- (a) fashioning "your own" Ankh tool with transharmonic copper
- (b) activating the Cruxansataea field as part of Flame Body activation
- (c) the level of Flame Body activation in which one has the ability to begin creating external merkaba fields

4. Flame Body activation can be engaged _____.

7. Normal Anti-Christos Merkaba _____.

- (a) compacts seed atom energy until used up, expands until it bursts and disintegrates, then goes back into the natural grids
- (b) turns the body into an energy-sucking device that plugs into the natural grids
- (c) requires implants to help transduce frequency to keep it going
- (d) all of the above

8. Shadow Dancers _____.

- (a) force themselves through the Shadow Bodies of 80 to 95% of channels to progressively take possession of the channel's body
- (b) push themselves into another being's circuitry, resulting in chemical imbalances and very serious behavioral issues
